ADEQUATE

INFOSOFT PVT. LTD.

The Ad-Tech Project Which We Built:

We worked on three Ad-tech projects:

- ✓ One is for our Malaysian client's Business Application so that he can promote his Hotel Business on Google.
- ✓ Two are for our E-commerce websites project as per the client requirements from Denmark.

We are under the NDA with the client so we can't share the details here.

Mockup of Our project:

- ✓ Google AdWords is Google's online advertising program which use to promote the business , help sell products or services, raise awareness, and increase traffic on website.
- ✓ Sorry, we can not give you the access of the account because we are under the NDA with client.
- ✓ But, we can provide you the walk through of our Ad-Teach project via Skype for Mockup.

It will good if we can discuss over the Skype for required Mockup.

What We Built:

- ✓ First, as Adword is a media buying channel so we take the access of account from the client for access of Google API.
- ✓ Then, we write a code to integrate Google Adword API to the client website so that client will be able to create advertisements which will appear on relevant Google search results pages and their network of partner sites.

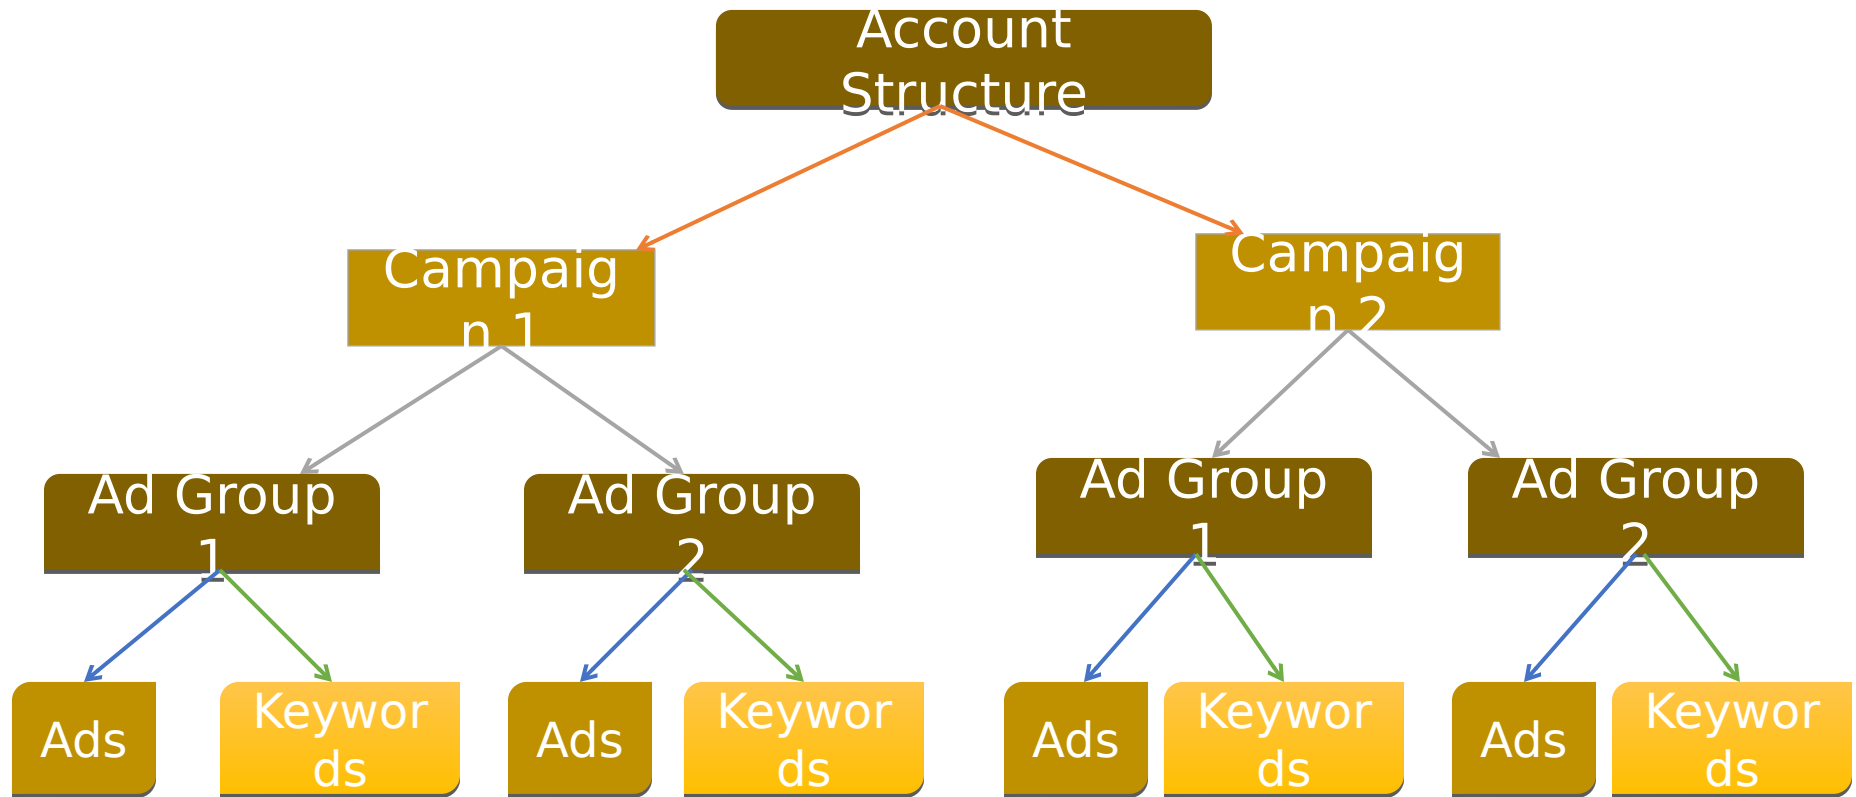

Please go through the above slides for more details of our work:-
